NOMA® REFLEX ROLL is an insulating and heat-reflecting foil for radiators made from EPS covered with a metallic polymer foil.

Product features

- Saves heating costs
- Reflects heat back to the room and reduces energy losses
- Enhances the living comfort and accelerates the temperature rise in the rooms
NOMA® REFLEX ROLL

- Thickness (nominal): 3 mm
- Density: 17 kg/m³
- Heat reflection >95% - Test report P15-071/2012 from Fraunhofer-Institut
- Thermal conductivity (λ): Measured value at +20°C: 0,031 W/mK – EN ISO 12667
- Thermal resistance at 20 °C: 0,097 m² K/W
- Compression strength: ± 4,1 t/m² - ISO 844 (0,5 mm)
- Dimensional stability under heat – short exposition up to: 100 °C
- Application temperature range under no stress: -40 °C to +70 °C
- Fire classification: Euroclass E according to EN 13501-1:2007+ A1 2013, when used on substrates made of wood or wood-based materials (density ≥ 300 kg/m³) and solid mineral substrates.

Installation tips:
- Surface must be clean and dry.
- Cut NOMA® REFLEX ROLL to size (scissors or cutter) by taking account of the incisions for the radiator suspensions
- Apply Decofit adhesive (P or F) on the polystyrene side
- Slip NOMA® REFLEX ROLL behind the radiator and press on carefully
- Please note: maximum radiator temperature = 60 °C
