NOMA® PARKETT
PRO SILVER ROLL 3mm

Polyethylene foam with silver coloured, metallised vapour barrier sheet, overlapping and self-adhesive strip. Ideally suited for floating parquet and laminate floors.

Product features

- Underlayer in professional quality acc. to DTU 51.11
- PP-sheet with 20 µ thickness, with a performance of a PE-sheet of 100 µ. Guarantees outstanding vapour barrier properties.
- Acc. to noise standard RA 2000; efficient impact noise reduction and good thermal resistance.
- Easy to install due to overlapping and self-adhesive strip.
NOMA® PARKETT PRO SILVER ROLL 3mm

- Thickness: ± 3 mm acc. to DIN EN ISO 2286-3
- Impact sound reduction ΔLw: 19 dB (with laminate) acc. to DIN EN ISO 140-8 / 7172
- Thermal resistance R: ± 0,10 m²K/W acc. to ISO 8301
- Thermal conductivity at 10°C: ± 0,029 W/mK
- Water permeability value (Sd value): > 97 m acc. to DIN 52615 / DIN EN 12086
- Compression strength: ± 0,611 t/m² acc. to ISO 3386-1
- Leveling of floor irregularities: ≤ 2 mm
- Density: ± 20 kg/m³ acc. to EN ISO 845
- Surface mass (approx. values): ± 60 g/m²
- Application temperature range: -40 °C to +70 °C
- Fire classification: B3 according to DIN 4102-1
- Application with underfloor-heating: yes, provided that the underlayer is placed with laminate or floating parket floor with a maximum thickness of 8 mm and/or a thermal resistance of ≤ 0,05 m² K/W

Installation:
- Correct all unevennesses of the floor bigger than 2 mm.
- Place a first strip (aluminium side upwards) and cut it to the size required using a cutter.
- Unfold the overlapping edge and lay it edge-to-edge against the first, join the edges by means of the integrated adhesive tape.
- Cut the surplus material at the ends after installation of the laminate floor.
